

Daily Reflections

Please keep the following questions in mind as you record your reflections on the day's activities in your notebook. We will periodically ask you to post your reflections to the Trello board to share in your "professional learning community".

1. On which topic and/or model(s) are you reflecting?
2. What did you learn? Identify the "aha" moments you experienced.
3. What further question(s) might you have?
4. Identify the limitations in the models used.

Final Reflection (to be posted to Trello)

1. What is the focus of your final reflection? On which activity, story or topic are you centering your attention for your final reflection?
2. Provide a brief description of your school demographic.
3. What materials did you find helpful in understanding the topic?
4. How will you incorporate these materials in your classroom?
5. What is your approximate timeline of implementation?
6. What artifacts will you collect as evidence of student growth in learning? (Keep in mind that a collection of a variety of different artifacts will contribute to a preponderance of the evidence.)
