## 13. Please “like” the Campbell Family Facebook page -

<https://www.facebook.com/TheChoiceLife>

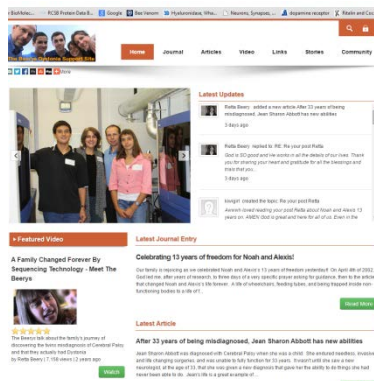

14. MLD Foundation - <http://www.mldfoundation.org/mld-101-what.html>

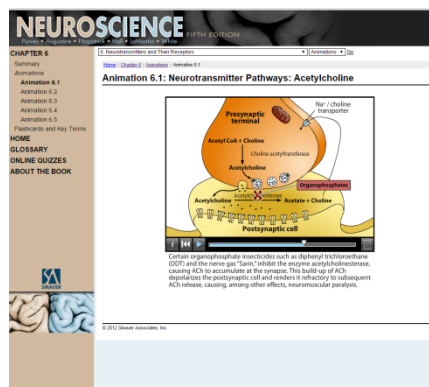

The screenshot shows the MLD Foundation website. The header includes the MLD Foundation logo and the text "Promoting Education". Below the header, there is a navigation menu with links like "Foundation", "The CARES™", "Conference", "Awareness", "Research", "Education", and "Quick Links". The main content area is titled "What is MLD?" and "MLD-101 ... A Layperson's Overview". It provides a definition of MLD as a form of metachromatic leukodystrophy, a biochemical overview explaining the role of the enzyme sulfatase, and types of MLD. It also mentions that MLD is not contagious and can be passed to others through any sort of contact.

15. The Beery Family webpage - <http://dystonia.thebeerys.com/>

The screenshot shows the homepage of "The Beery Family" website. The header includes the website name and a navigation menu with links like "Home", "Journal", "Articles", "Videos", "Links", "Stories", and "Community". The main content area features a "Latest Updates" section with recent posts, a "Featured Video" section with a video titled "A Family Changed Forever By Sequencing Technology - Meet The Beerys", and a "Latest Journal Entry" section with an entry titled "Celebrating 13 years of freedom for Noah and Alexis!".

16. Neuroscience - <http://sites.sinauer.com/neuroscience5e/animations06.html>

The screenshot shows the "Neuroscience" website. The header includes the word "NEUROSCIENCE" and the text "FIFTH EDITION". Below the header, there is a navigation menu with links like "CHAPTER 6", "Summary", "Animations", "Animation 6.1", "Animation 6.2", "Animation 6.3", "Animation 6.4", "Animation 6.5", "Flashcards and Key Terms", "HOME", "GLOSSARY", "ONLINE QUIZZES", and "ABOUT THE BOOK". The main content area is titled "Animation 6.1: Neurotransmitter Pathways: Acetylcholine" and features a diagram of a presynaptic terminal and a postsynaptic cell. The diagram shows the synthesis of acetylcholine from acetyl-CoA and choline, its release into the synaptic cleft, and its binding to receptors on the postsynaptic cell.
