

Playing the Game

1. Each person draws one card from the small pile of cards. Place it face up in front of you. This is your switch card. Set the rest of the cards in the short deck aside. You won't need them again.
 - If you drew a jack, your switch value is 25.
 - If you drew a queen, your switch value is 35.
 - If you drew a king, your switch value is 45.
2. Draw a card face down from the larger pile that contains aces and the number cards. **Don't look at this card.** Place it face down below your switch card. This is your risk card.
3. Draw cards from the large pile and place them face up next to the risk card. These are your choice cards. Draw as many choice cards as you wish, but keep in mind that you do not want the total of these cards plus the risk card to equal or go over your switch value.
 - An ace = 1 point
 - Other cards = the number on the card
4. When you have finished drawing cards, turn over the risk card. Did you match or go over your switch value?
